Research Assistant in Public Health

Desired Qualification: Masters in Public Health with 1-2 years of experience

Role Description

In our research, we design, develop and evaluate different types of technology-based solutions for problems related to maternal and child health. In one of our project, we have developed a customized training and learning tool for community health workers. The tool is being used in the ongoing pilot-deployments in the regions of Haryana and Delhi with our collaborators SWACH, Chandigarh and Delhi State Health Mission. Further, there are other mobile-based applications for supporting information exchange services in rural areas to promote pregnancy and childcare. Our other projects are in the areas of menstrual health education and mental health support.

We are looking for a research assistant who can actively participate in the research by involving in activities such as training clients, conducting workshops, data analysis, coordinating with clients and research writing.

For more details about our research lab, please visit www.codeslab.io
