Get future-ready with IIIT-D'S Summer School on Artificial Intelligence

Indraprastha Institute of Information Technology, Delhi (IIIT-D) announces its summer school on Artificial Intelligence for July-August 2018 which will focus on the fundamentals and advances in Artificial Intelligence and Machine Learning, including Deep Learning and Data Analytics. With this initiative, the institute is gearing up to prepare the fresh blood entering the industry with all the Knicks and knacks of AI and ML to better deal with the contemporary needs of the industry. The classes will also be open up for faculties, government officials and industry professionals who are looking for an opportunity to polish their existing skills.

The school targeted towards students and professionals interested in learning algorithms in machine learning and artificial intelligence will also have tracks related to three domains: computer vision, natural language processing, and autonomous driving, robotics. With classes scheduled in the weekends of July-August, it will allow working professionals to take the course without making any change in their routine activities. Participants will get to interact with several skilled and seasoned industry professionals like Mayank Vatsa, Richa Singh, Tanmoy Chakraborty and many more. Along with this, on successful completion of the programme, enrollees will be awarded a certificate from the Infosys, Center for Artificial Intelligence, and IIIT-D.

On the introduction of Summer School on Artificial Intelligence, Prof. Pankaj Jalote, Director at IIIT-Delhi said, *"It is the first time that the institute has come up with such an initiative. But with increasing focus on research and applications of AI in the industry, the existence of such schooling is becoming a necessity to prepare the youth for the virtual age ahead and make them adaptive to the competition at the global stage."*
